

## NLP and Word Embeddings

## GloVe word vectors

## GloVe (global vectors for word representation)

I want a glass of orange juice to go along with my cereal.

## Model

minimize 
$$\sum_{j=1}^{10,000} f(X_{ij}) (O_i^T e_j + b_i + b_j^T - log X_{ij})^2$$

weighting term

 $f(X_{ij}) = 0$  if  $X_{ij} = 0$ . "O  $log o'' = 0$ 

This, is, of, a,...

Oi, e, are symmetric during the symmetric of the symmetric or symmetri

A note on the featurization view of word embeddings
